Definitions of the trading locations for which Platts publishes indexes or assessments

The following guide contains the primary specifications for S&P Global Energy's Platts Chemical assessments in the Americas. All the assessments listed here employ Platts Assessments Methodology, as published in the Platts-Assessments-Methodology-Guide.pdf

These guides are designed to give Platts subscribers as much information as possible about a wide range of methodology and specifications.

This guide is current at the time of publication. Platts may issue further updates and enhancements to this methodology and will announce these to subscribers through its usual publications of record. Such updates will be included in the next version of this guide. Platts editorial staff and managers are available to provide guidance when assessment issues require clarification.

Assessments are published in accordance with the Holiday Publication Schedule | S&P Global. Daily assessments are published on weekdays and are normally suspended in line with public holidays in respective offices (Singapore, India). Weekly assessments are published on the specified days of the week, and are normally brought forward to the preceding working day, in case of a holiday.

The Market-on-Close assessment process for MTBE, benzene and paraxylene is facilitated through the eWindow communication tool. For further details, please consult the Chemicals timing and increment guidelines at chemicals-timing.pdf

Olefins and Derivatives

Duties: Ex-tank China assessments include prevailing value added tax.

Ethylene (C2)

Specification: Minimum purity of 99.9%.

Basis locations:

FOB Korea: Daesan, Ulsan, Yeosu.

CFR Southeast Asia: Indonesia (Merak), the Philippines (Manila Bay anchorage, barge cost not included), Thailand (Map Ta Phut); Malaysia (Pasir Gudang, Kertih).

CFR Northeast Asia: Korea (Daesan, Ulsan, Yeosu), Taiwan (Kaohsiung, Mailiao), Japan (Mizushima, Chiba, Tokuyama, Kashima, Ube, Oita, Yokkaichi, Kawasaki); China (Shanghai, Ningbo, Nantong).

Propylene (C3)

Specification: Polymer grade with minimum purity of 99.6%.

Basis locations:

FOB Korea: Daesan, Onsan, Ulsan, Yeosu.

CFR Taiwan: Kaohsiung, Keelung, Mailiao, Taichung.

CFR Southeast Asia: Indonesia (Merak, Batam, Surabaya), the Philippines (Manila Bay anchorage, barge cost not included), Malaysia (Kertih, Kuantan, Pasir Gudang, Port Dickson), Singapore, Thailand (Bangkok, Sriracha, Map Ta Phut).

CFR China: Shanghai, Ningbo, Nantong.

FOB Japan: Mizushima, Chiba, Tokuyama, Kashima, Ube, Oita, Yokkaichi, Kawasaki.

Butadiene (C4)

Specification: Minimum purity of 99.5%. Dimer content maximum 1,000 ppm.

Basis locations:

FOB Korea and CFR Northeast Asia: Daesan, Ulsan, Yeosu; Japan (Mizushima, Chiba, Tokuyama, Kashima, Ube, Oita, Yokkaichi, Kawasaki).

CFR Taiwan: Mailiao, Kaohsiung.

CFR Southeast Asia: Indonesia (Merak); Thailand (Map Ta Phut, Rayong); Malaysia (Penang).

FOB China: Ningbo, Zhoushan, Zhenhai, Shanghai. Loadings from other ports in China may be normalized to East China.

CFR China: Nantong, Tianjin, Dalian, Shanghai, Ningbo, Guangzhou.

Raffinate-1

Specification: Minimum 40% of isobutene content.

Basis locations: South Korea (Daesan, Ulsan, Yeosu), Japan (Mizushima, Chiba, Tokuyama, Kashima, Ube, Oita, Yokkaichi, Kawasaki),Taiwan (Mailiao, Kaohsiung), China (Nantong, Tianjin, Dalian, Shanghai, Ningbo Guangzhou).

Differential: Cash differential assessment which represents a spot premium or discount against the midpoint of the same day's Platts Naphtha C+F Japan Cargo (PAAAD00) assessment.

Oxides

Specification:

Ethylene Oxide (HPEO): Minimum purity of 99.9% by weight, maximum water content of 70 ppm and maximum aldehydes of 40 ppm. Platts publishes values based on variable and fixed costs of production.

Propylene Oxide (PO): Minimum purity of 99.9%; maximum water content (wt) of 100ppm; maximum aldehydes content of 100ppm.

Basis locations:

FOB Northeast Asia: Korea, Taiwan, Japan, China.

CFR China: Zhangjiagang, Ningbo, Yantai, Tianjin.

Ethylene Glycols (EG)

Specification:

Monoethylene Glycol (MEG): Fiber grade with minimum purity of 99.8%.

Diethylene Glycol (DEG): Minimum purity of 99%.

Triethylene Glycol (TEG): Minimum purity of 99%.

Basis locations:

CFR China: Taicang, Jiangyin, Nantong, Ningbo, Zhangjiagang.

CFR Southeast Asia: Malaysia (Port Klang), Thailand (Map Ta Phut, Bangkok).

Ex-tank China: Nantong, Taicang, Jiangyin, Zhangjiagang.

© 2025 by S&P Global Inc. All rights reserved.

Ethanolamines (EA)

Specification:

Monoethanolamine (MEA): Minimum purity of 99%, colorless appearance.

Diethanolamine (DEA): Minimum purity of 99%, colorless appearance.

Triethanolamine (TEA): Minimum purity of 99%, colorless appearance.

Contract prices for Olefins and Derivatives

MEG CP: Platts publishes a monthly CFR Asia Producer Contract Price nomination by MEGlobal and Sabic.

Aromatics and Derivatives

Physical laycans and rolls: Each half-month laycan (W1, W2 etc.) reflects loading or delivery laycans covering 13, 14, 15 or 16 days (if it is a 28, 29, 30 or 31-day month). All half-month laycans are rolled forward on the 1st and 16th day of each calendar month. For example, on March 1, the W1= H1 March, W2=H2 March, W3=H1 April, W4=H2 April, W5=H1 May, and W6=H2 May.

Derivatives roll: Balance month derivatives assessments are available up to and including the 15th of each month. Derivatives assessments roll on the first publishing day of a new month, and the first publishing day after the 15th of every month. For example, on November 1, the assessed months would be BalMo=Balance November, M1=December, M2=January, M3=February, M4=March, M5=April and M6=May. On November 16, the forward months assessed would be M1=December, M2=January, M3=February, M4=March, M5=April and M6=May.

Normalization: Information deviating from the Platts standard may be considered subject to normalization. This includes, but is not limited to freight normalization for locations outside the stated basis, and interest rate normalization for deviation in payment terms.

Duties: Ex-tank/ex-warehouse China assessments include prevailing value-added tax.

Origin: Any origin, unless otherwise specified.

Benzene

Specifications: latest edition of ASTM D-2359.

Basis locations:

FOB Korea: Onsan, Ulsan, Yeosu loading from berths able to accommodate MR (Medium Range)-sized vessels. Platts will normalize bids, offers and trades which include Daesan/Incheon ports.

CFR China: Caojing, Ningbo, Jiangyin, Changzhou, but excludes terminals that are unable to accommodate vessels larger than 5,000 dwt.

CFR Taiwan: Kaohsiung, Keelung, Mailiao;

FOB Southeast Asia: Singapore, Thailand (Map Ta Phut), Malaysia (Pasir Gudang), Indonesia (Tuban).

Ex-tank China: Jiangyin and Changzhou.

Nomination:

FOB Korea: Buyers to declare the half-month loading by the 10th of the preceding month. Sellers to declare load port 15 days prior to the first day of the declared half-month laycan. Buyers to declare five-day loading laycan 10 days prior to the first day of the half-month laycan. Buyers to nominate a vessel 10 days prior to the first day of the five-day loading laycan. Buyers to issue irrevocable L/C at sight seven days prior to the first day of the laycan.

CFR China and CFR Taiwan: Sellers to declare the half-month of delivery 15 days prior to the first day of the month. Buyers to declare discharge port 15 days prior to the first day of the half-month laycan or 15 days prior to the first day of the laycan. Sellers to nominate vessel 10 days prior to first day of the half-month laycan or 10 days prior to the first day of the laycan.

Import Parity: The import parity equivalent of the East China domestic assessments is derived by factoring in the prevailing value-added tax rate, prevailing import duties and the USD/Yuan central parity exchange rate.

Derivatives: Platts publishes assessments for derivatives that settle against the Platts FOB Korea assessments.

Toluene

Specification:

FOB Korea: minimum purity of 99.1%.

FOB China: minimum purity of 99.5%.

CFR India: minimum 99.5% purity.

Basis locations:

FOB Korea: Daesan, Ulsan, Yeosu;

FOB China: Ningbo, Zhangjiagang, Jiangyin, Nantong. Loadings from other Chinese ports such as Maoming, Huizhou, Dongguan, Zhuhai, Dalian, Tianjin may be normalized;

CFR India: Kandla and Mumbai.

CFR Southeast Asia: Malaysia (Port Klang), Indonesia (Merak, Surabaya), the Philippines (Batangas).

Ex-tank China: Zhangjiagang.

Nomination:

FOB Korea: Buyers to declare the half-month loading by 10th of the preceding month. Sellers to declare load port 15 days prior to the first day of the declared half-month laycan. Buyers to declare five-day loading laycan 10 days prior to the first day of the half-month laycan. Buyers to nominate vessel 10 days prior to the first day of the five-day loading laycan. Buyers to open irrevocable L/C at sight seven days prior to the first day of the laycan.

CFR China: Sellers to declare the half-month of delivery by 15 days prior to the first day of the month. Buyers to declare discharge port 15 days prior to the half-month delivery period or 15 days prior to the first day of the laycan. Sellers to nominate

© 2025 by S&P Global Inc. All rights reserved.

vessel 10 days prior to 1st day of the half-month of delivery or 10 days prior to the first day of the laycan.

Differential: The CFR India cash differential assessment reflects the value of the CFR India assessment above the Platts daily FOB Korea toluene marker.

Isomer-Grade Mixed Xylenes (Iso-MX)

Specification: Latest edition of ASTM D-843. Maximum bromine index of 20 ppm, maximum ethylbenzene content of 18% by wt, maximum non-aromatics content of 1% by wt and minimum paraxylene content of 18% by wt.

Basis locations:

FOB Korea: Daesan, Ulsan, Yeosu, Incheon.

CFR Taiwan: Kaohsiung, Keelung, Mailiao.

CFR China: Zhangjiagang.

Ex-tank China: Zhangjiagang.

Payment terms: for CFR Taiwan L/C 30 days for Asia-origin cargoes and L/C 60 days for deep-sea origin cargoes.

Nomination:

FOB Korea: Buyers to declare the half-month of loading on the 15th calendar day of the month prior to the month of loading. Sellers to declare the port of loading on the 15th calendar day of the month prior to the month of loading. Buyers to declare five-day loading laycan 10 days prior to the first day of the half-month laycan. Buyers to nominate vessel 10 days prior to the first day of the five-day loading laycan. Buyers to open irrevocable L/C seven days prior to the first day of the laycan.

CFR Taiwan and CFR China: Sellers to declare half-month of delivery on the 15th calendar day of the month prior to the month of delivery. Buyers to declare discharge port on the 15th calendar day of the month prior to the month of delivery. Sellers to nominate vessel at least 10 days prior to the first day of the half-month of delivery. Buyers to open irrevocable L/C no later than seven days prior to the payment date or first day of the laycan, whichever is earlier.

Solvent-Grade Mixed Xylenes (Sol-MX)

Specification: maximum non-aromatics content of 4%, conforming to international standards and equivalence.

Basis locations:

FOB Korea: Daesan, Ulsan, Yeosu.

CFR Southeast Asia: Indonesia (Merak, Surabaya), Malaysia (Port Klang), Vietnam (Ho Chi Minh City).

CFR China: Zhangjiagang, Jiangyin and Changshu.

CFR India: Kandla and Mumbai.

Differential: CFR India cash differential assessment reflects the value of the CFR India assessment above the Platts weekly FOB Korea marker.

Paraxylene (PX)

Specification: minimum purity of 99.7%, conforming to international standards and equivalence.

Conversion: The CNY conversion takes the first published laycan of the CFR Taiwan/China PX assessment (W2).

Basis locations:

FOB Korea: Ulsan, Onsan, Daesan, Yeosu. In the absence of bids, offers, trades and price indications on a FOB Korea basis, Platts will assess the daily FOB Korea assessments based on a netback reflective of prevailing freight rates to the CFR Taiwan/China marker.

CFR Taiwan/China: standard Taiwan ports, Ningbo, Dalian, Jiangyin, Jiaxing.

CFR Southeast Asia: Indonesia (Merak, Jakarta), Malaysia (Kuantan), Thailand (Map Ta Phut).

Cargo size: Near-haul PX refers to 5,000 mt cargo, delivered on and up to 20,000 dwt ship with a single/double or first/second port of discharge. In case of more than two discharge ports, the seller is expected to deliver the cargo as either the first or second stop. Long-haul PX will refer to PX delivered on a larger ship, up to 35,000 dwt, with any order of discharge. The pricing information for long-haul PX cargo will be reflected in the assessment, subject to normalization.

Payment terms: Credit terms are typically bilaterally agreed upon and accepted by both counterparties. Platts assessment reflects 30-day credit terms for near-haul PX, in line with standard market practice for typical observable trading activity. Platts notes that the typical standard near-haul cargo L/C is on a 30-day basis, in line with market practice for typical observable trading activity. Platts understands that there are instances where an L/C of 45 days is accepted, which is an exception to the norm and is typically bilaterally agreed and accepted by both counterparties. Market information with non-standard credit and payment terms may be normalized to the stated standard.

Sailing times: Platts expects a typical sailing time of up to 10 days for cargoes delivered against a near-haul trade published in the Platts MOC assessment process. There is no sailing time guidance for long-haul cargoes. The sailing time refers to the typical laden voyage time taken from the load port to the discharge port, based on distance in nautical miles. For PX cargo trades reported through the Market on Close assessment process, buyers who receive a 5,000-mt cargo on a non-commensurate vessel should not be exposed

© 2025 by S&P Global Inc. All rights reserved.

to demurrage charges beyond the rate associated with the commensurate vessel size used to deliver PX cargo, which from an extensive study of the shipping market and from market feedback, Platts has found to be up to 20,000 dwt. Sellers may deliver cargoes against MOC trades into CFR Taiwan/China on a larger vessel should they choose to, but the buyer should not be exposed to the full demurrage as stated in the charter party agreement for a vessel above 20,000 dwt. For long-haul PX cargo trades reported through the MOC assessment process, the discharge rate (laytime) upon delivery of cargoes should reflect either as stated in the charter party agreement or capped at 150 mt per hour for a 5,000 mt cargo, whichever is the lower of the two. In addition to the above, the discharge rate (laytime) upon delivery of near-haul PX cargoes, against trades in the MOC process will reflect either as stated in the charter party agreement or capped at 125 mt/hour for a 5,000 mt cargo, whichever is the lower of the two. Platts publishes near haul-long haul spreads for Month 1 (M1) and Month 2 (M2).

PX demurrage: Daily lump-sum demurrage rate of 20,000 dwt vessels, typically loading 21-30 days forward.

Terms and conditions: Platts assesses bids on CFR Taiwan/China basis with standard ports of destination at buyer's option; and offers only at buyer's option of port location. Platts may not consider for assessment purposes offers and bids of restrictive optionality. This includes, but is not limited to, single port destination offers, or bids for delivery into ports/terminals which cannot physically receive vessels above 10,000 dwt.

For any-month bids or offers on CFR basis, seller's optionality over half-month timing is assumed. Platts assesses cargoes of any and all origins in the daily PX CFR Taiwan/China assessments. Country-specific bids or trades that do not conform to the norms of trading may be normalized for assessment or may not be considered for publication.

Terminal nominations for trades published in the PX CFR Taiwan/China MOC assessment process should be reasonably performable within the published laycan and should account for current infrastructure conditions. Buyers should not knowingly nominate terminals that have a high probability of being unavailable for performance. Trades are subject to performance review and failure to adhere to Platts editorial guidelines can lead to a review of participation status.

Nomination:

FOB Korea: Buyers to declare the half-month of loading on the 15th calendar day of the month prior to the month of loading. Sellers to declare the port of loading on the 15th calendar day of the month prior to the month of loading. Buyers to declare five-day loading laycan 10 days prior to the first day of the half-month laycan. Buyers to nominate vessel at least 10 days prior to the first day of the half-month laycan.

CFR Taiwan/China: Sellers to declare half-month of delivery on the 15th calendar day of the month prior to the month of delivery. Buyers to declare discharge port on the 15th calendar day of the month prior to the month of delivery. Sellers to nominate vessel at least 10 days prior to the first day of the half-month of delivery.

Derivatives: Platts publishes daily PX derivatives that settle against the Platts CFR Taiwan/China PX assessments.

Orthoxylene (OX)

Specification: Minimum purity of 98%; maximum non-aromatic content of 0.3%.

Basis locations:

FOB Korea: Ulsan, Yeosu.

CFR Southeast Asia: Singapore, Indonesia, Thailand.

CFR China: Zhangjiagang.

Payment terms: FOB Korea and CFR Southeast Asia: L/C 30 days; CFR China: L/C 90 days.

Ethylbenzene (EB)

Specifications: Latest edition of ASTM D-3193.

Basis locations: Major ports in North or East China

Payment terms: Cash on sight

Styrene Monomer (SM)

Specification: Latest edition of ASTM D-2827.

Basis locations:

FOB Korea: Daesan, Ulsan, Yeosu; CFR China: Jiangyin, Nantong, Ningbo, Zhangjiagang.

FOB China: Jiangyin, Nantong, Zhangjiagang, Changshu.

CFR Taiwan: Kaohsiung, Mailiao, Anping.

CFR Southeast Asia: Map Ta Phut, Manila Bay (anchorage, barge cost not included).

CFR India: Mumbai, Vizag.

Ex-tank China: Zhangjiagang, Jiangyin and Changzhou.

Nomination:

FOB Korea: Buyers to declare the half-month loading by 15 days prior to the first day of the month. Sellers to declare load port 15 days prior to the first day of the declared

© 2025 by S&P Global Inc. All rights reserved.

half-month laycan. Buyers and sellers mutually agree to a maximum five-day loading laycan. Buyers to nominate vessel 10 days prior to the first day of the loading laycan. Buyers to open irrevocable L/C at sight seven days prior to the first day of the laycan.

CFR China and CFR Taiwan: Sellers to declare the half-month of delivery by 15 days prior to the first day of the month. Buyers to declare discharge port 15 days prior to the half-month delivery laycan or 15 days prior to the first day of the laycan, prior to L/C issuance. Sellers to nominate vessel 10 days prior to the first day of the laycan.

Caprolactam (CPL)

Specification: Flake grade with maximum water content of 100 ppm.

Basis locations:

CFR Far East Asia: China (Shanghai, Ningbo, Zhangjiagang, Xiamen, Guangzhou, Jiangmen, Qingdao, Tianjin, Dalian), Taiwan (Kaohsiung).

CFR Southeast Asia: Malaysia (Port Klang), Indonesia (Tanjung Priok), Thailand (Bangkok).

Cyclohexane (CX)

Specification: Colorless clear liquid form with a minimum purity of 99.9%.

Adipic Acid

Specification: Minimum purity of 99.8%, maximum iron content of 0.5 ppm and maximum ash content of 4 ppm, in crystalline powder form.

Purified Terephthalic Acid (PTA)

Specification: Minimum purity of 95%.

Basis locations:

CFR China: Ningbo, Zhangjiagang, Shanghai.

FOB China: Dalian, Gulei, Hainan, Lianyungang, Ningbo, Zhangjiagang, Zhapu, Zhuhai.

CFR Southeast Asia: Indonesia (Merak, Jakarta), Malaysia (Port Klang), Thailand (Laem Chabang), Vietnam (Ho Chi Minh City).

CFR India: Mumbai.

Contract Prices for Aromatics

Benzene CPs: Platts publishes contract price by China Petroleum & Chemical Corporation, or Sinopec. Platts also publishes the monthly nomination and settlement contract price by ENEOS Corporation.

PX CPs: Platts publishes an industry-settled monthly Asia Contract Price (ACP). The ACP is updated when available, once Platts has information that two independent buyers and two independent sellers have agreed on the same price. If a full monthly settlement is not reached, Platts will not publish the ACP settlement and the value will reflect as 'NA'. In addition, Platts publishes the monthly contract price settlement and nomination by China's Sinopec.

Methanol and MTBE

Methanol

Specification:

Ex-tank China, FOB Shanghai: Minimum purity of 99.85%; maximum water content of 0.1% by total weight, maximum ethanol content of 50 mg/kg.

Other assessments: Minimum purity of 99.85%; maximum water content of 0.1% by total weight; maximum ethanol content of 50 mg/kg.

Basis locations:

CFR China: Nantong, Taicang, Jiangyin, Zhangjiagang, Ningbo.

CFR Korea: Ulsan, Yeosu, Pyeongtaek.

CFR Taiwan: Mailiao, Kaohsiung, Taichung.

CFR Southeast Asia: Indonesia (Dumai); Malaysia (Port Klang, Kuantan); Singapore. Deliveries to all other Southeast Asian ports will be normalized to this basket of ports applying freight differentials.

CFR India: Kandla, Mumbai and Hazira. All pricing information for product delivered into other ports in India such as Cochin, Mangalore or Visakhapatnam may be normalized to the standard.

Ex-tank China: Nantong, Taicang, Jiangyin, Zhangjiagang, Ningbo.

Ex-tank India: Kandla.

Duties: Ex-tank China and India assessments include prevailing import duties. Ex-tank China assessments also include prevailing value-added tax.

Origin: Non-sanctioned origins.

Derivatives: Platts publishes daily methanol derivatives that settle against the physical Platts CFR China Methanol assessments. Transactions for methanol derivatives reported in the MOC are bilateral trades between counterparties. Any company submitting a bid or offer that can only be traded on a cleared basis should state as such in their bid or offer at the time of submitting for publication.

- **Methanol bunker fuel:** Value of spot methanol delivered from the terminal to a receiving vessel for fueling, via barge, factoring in logistics cost. Platts also expresses this value in LNG and fuel oil energy content equivalent. Platts also publishes prices of key marine fuels by calorific value. The comparisons and conversion factors can be found in Platts Global Bunker Fuels specifications guide at bunker-fuels-specifications.pdf

Sustainability: Methanol marine fuel (MMF) reflects maximum carbon intensity of not more than 90 gCO_2e/MJ. and Low-carbon MMF reflects a maximum carbon intensity of 32.9gCO_2e/MJ, certified by ISCC EU or another recognized industry body.

- **eMethanol production cost:** Factors in the cost of production, transportation and storage for renewable methanol, produced via electrolysis and direct air-captured carbon dioxide. The assessment is aligned with the assumptions of the Process Economics Program (PEP). The variable and fixed inputs are periodically reviewed to ensure they are representative of prevailing market dynamics.

MTBE

Specification:

FOB Straits/Singapore: Minimum purity of 98%; maximum water content of 1,000 ppm; maximum methanol content of 1.5% by total weight; maximum sulfur content of 50 ppm.

FOB China: Minimum 98% purity MTBE, maximum 0.5% methanol, 10 ppm sulfur and 1000 ppm water content.

Basis locations:

FOB Straits/Singapore: Singapore, Tanjung Bin, Tanjung Langsat, Pengerang.

FOB China: Yantai, Dalian, Laizhou, Qingdao, Longkou, Tianjin, Dongying, Quanzhou, Weifang, Caizhou.

MTBE factor: The factor expresses the ratio between daily MTBE assessments basis FOB Straits and 92 RON gasoline assessments FOB Straits. The factor calculation uses the mean of the low and high of Platts MTBE and 92 RON cargo assessments respectively. For example, if 92 RON gasoline is assessed at $119.99-$120.01/barrel and MTBE is assessed at $1,069-$1,071/mt (equivalent to a mean of $126.63/barrel using a standard barrels-to-metric ton conversion rate of 8.45), then a factor of 1.055 would be published (to represent $126.63/barrel divided by $120/barrel). The factor is published daily to three decimal places. 92 RON gasoline and MTBE are assessed daily at 4:30 pm Singapore time (0830 GMT). The 92 RON gasoline assessment reflects the value of cargoes loading 15-30 days forward from the date of publication.

Nomination: Sellers or buyers are to declare the five-day date range at the time of submitting a bid or offer for publication. The seller must declare the terminal 10 days prior to the start of the five-day date range. The buyer must nominate the vessel and narrow the loading window to three days seven days prior to loading, subject to loading terminal acceptance.

Origin: Any origin, apart from Russian material.

Contract Prices for Methanol

Methanol CP: Platts publishes a monthly Asian Contract Price by Methanex Corp.

Polymers

Duties: Ex-warehouse, ex-works China assessments include prevailing value-added tax.

Middle East netbacks: are calculated as Platts CFR Far East Asia/China assessments minus prevailing container freight rate from Al Jubail to Shanghai for a standard 20-foot and 40-foot container. This freight rate is updated weekly on Wednesday.

Polyethylene (PE)

Specification: Please consult the table. Additional notes below:

HDPE Injection: majority of business focused on crate grade material with melt flow index of 5.0-11.0.

HDPE Blowmolding: medium molecular weight.

HDPE Film: high and medium molecular weight material.

HDPE Yarn: Melt flow index of 0.7-1.1.

Metallocene C6 LLDPE: 1-Hexene comonomer with a density of 918-940 kg/m3 with melt flow index of 1.0-4.5.

LLDPE Butene: Melt flow index of 1.0-2.0.

LDPE General Purpose: Melt flow index of 0.3-4.0.

Basis locations:

China: Shanghai, Ningbo, Xiamen, Shenzhen, Huangpu, Guangzhou, Xingang, Qingdao, Shantou and Tianjin.

CFR Southeast Asia: Indonesia (Jakarta, Surabaya), Singapore, the Philippines (Manila Bay), Malaysia (Port Klang),Thailand (Map Ta Phut, Laem Chabang).

CFR Vietnam Ho Chi Minh City.

CFR South Asia: India (Nhava Sheva, Mundra).

Ex-works East China: Shanghai, Zhejiang and Jiangsu.

FOB Middle East: Al Jubail (freight netback from Shanghai).

Ethylene Vinyl Acetate (EVA)

Specification:

Medium EVA – 18%-21% VAM content.

High EVA – 28% and above VAM content.

Basis locations: Ningbo, Shanghai.

Polypropylene (PP)

Specification: Please consult the table. Melt flow rate tested at 230°C.

Basis locations:

CFR Far East Asia: Shanghai, Shenzhen, Ningbo, Shantou, Hong Kong.

CFR Southeast Asia: Indonesia (Jakarta, Surabaya), Singapore, the Philippines (Manila Bay), Malaysia (Port Klang), Thailand (Bangkok, Laem Chabang, Map Ta Phut).

CFR Vietnam: Ho Chi Minh City.

CFR South Asia: India (Kolkata, Chennai, Mumbai, Nhava Sheva), Pakistan (Karachi).

Ex-works China: Huangpu, Jiulong, Ningbo, Qingdao, Shanghai, Tianjin, Xiamen, Xingang.

GCC: Dubai, Muscat.

Polystyrene (PS)

Specification: Please consult the table. EPS: bead size of 0.5-1.3 mm and a density of 10-20 grams per liter.

Basis locations:

CFR China: Shanghai, Dalian, Nanjing, Shantou, Guangzhou, Shenzhen, Nantong, Ningbo, Jiangyin, Zhuhai, Zhenjiang, Zhangjiagang, Hong Kong.

FOB Northeast Asia: China (Shanghai, Ningbo), South Korea (Busan, Yeosu), and Taiwan (Kaohsiung).

CFR Southeast Asia: Indonesia (Jakarta, Belawan Deli), Singapore, the Philippines (Manila Bay), Malaysia (Port Klang), Thailand (Bangkok), Vietnam (Ho Chi Minh City).

Acrylonitrile Butadiene Styrene (ABS)

Specification: Please consult the table.

Basis locations:

CFR China: Shanghai, Dalian, Nanjing, Shantou, Guangzhou, Shenzhen, Nantong, Ningbo, Jiangyin, Zhuhai, Zhenjiang, Zhangjiagang, Hong Kong.

CFR Southeast Asia: Indonesia (Jakarta, Belawan Deli), Singapore, the Philippines (Manila Bay), Malaysia (Port Klang), Thailand (Bangkok), Vietnam (Ho Chi Minh City).

Polyvinyl Chloride (PVC)

Specification: Suspension grade with K value of 66-68 (SG 5).

Basis locations:

FOB China: Shanghai, Tianjin and Qingdao.

© 2025 by S&P Global Inc. All rights reserved.

CFR China: Shanghai, Dalian, Nanjing, Shantou, Guangzhou, Shenzhen, Nantong, Ningbo, Jiangyin, Zhuhai, Zhenjiang, Zhangjiagang, Hong Kong.

CFR Southeast Asia: Indonesia, Singapore, the Philippines, Malaysia, Thailand, Vietnam.

Ex-works China: Shanghai, Zhejiang, Jiangsu, Shandong, Hebei, Tianjin, Guangdong, Fujian.

CFR India: Nhava Sheva, Kolkata, Chennai, Mumbai.

Polyethylene Terephthalate (PET)

Specification: Bottle-grade PET, minimum intrinsic viscosity of 0.76.

Basis locations:

FOB Northeast Asia: China (Jiangyin, Dalian, Zhangzhou, Ningbo, Shanghai).

FOB Southeast Asia: Thailand (Rayong), Malaysia (Port Klang), Indonesia (Cilegon, West Java).

Polyester Yarn and Fiber

Specification:

Partially Oriented Yarn (POY) 150D/48F: white and semi-dull.

Draw Textured Yarn (DTY) 150D/48F: white and semi-dull.

Fully Drawn Yarn (FDY) 150D/96F: white and semi-dull.

Polyester Staple Fiber (PSF) 1.4D38 mm: white, semi-dull, and direct-spun.

Basis locations: East China (Zhejiang, Jiangsu, Fujian).

Nylon (PA, polyamide)

Specification:

Nylon 6: Bright, semi-dull and full-dull textile grade resins with a viscosity of 2.4-2.7 g/ml.

Nylon 66: Engineering grade resin with a viscosity of 2.4-2.7 g/ml.

Acrylic Fibers

Specification: staple fiber; minimum 85% acrylonitrile content; Denier 3; undyed.

Polymethyl Methacrylate (PMMA)

Specification: General-purpose injection grade with Melt Flow Index of 230°VVC x 3.8KG, Izod Impact Strength 23°VVC Notched/-30°VVC Notched, Vicat Softening Temp 1kg,50°VVC/hr, 5kg,50°VVC/hr.

Basis locations:

CFR China: Guangzhou.

CFR Southeast Asia: Thailand (Map Ta Phut).

Polycarbonate (PC)

Specification: Clear pellets. Please consult the table. MFI tested per 10 minutes at 230°C.

Basis locations: China (Jiangyin, Dalian, Zhangzhou, Ningbo, Shanghai).

Polybutylene Terephthalate

Specification: Base resin, IV equal to or less than 1.1 dL/g.

Polyoxymethylene

Specification: MFR tested per 10 minutes at 190°C/2.16kg.

Liquid Epoxy Resin

Specification: Transparent, <1 on the Gardner Color Scale.

Basis locations: FOB Northeast Asia: South Korea (Busan, Kwang Yang, Yeosu), Taiwan (Kaohsiung, Taichung).

Rubber

Specification:

Styrene Butadiene Rubber (SBR): Non-oil extended emulsion SBR (ESBR1502). Mooney viscosity ML 1-4 (100 degrees Celsius (ASTM D 1646) 52 MU), Bound Styrene (ASTM D 5775) 23.5% wt, Organic Acid (ASTM D 5774) 6% wt, Soap (ASTM D 5774) 0.5% wt maximum, Volatile Matter (ASTM D 5668) 0.75% wt maximum, Ash (ASTM D 5667) 0.5% wt maximum.

Polybutadiene Rubber (PBR): Cis content above 92%, Mooney viscosity 45 MU, vinyl content of less than 4%, ash 0.5% wt maximum, Volatile Matter 0.75% wt maximum. The Mooney viscosity (ML1-4 at 100 C) is based on test method ASTM-D 1646. The Volatile Matter is based on test method ASTM-D 5668, while the Ash content is based on test method ASTM-D 5667.

Natural rubber: Maximum dirt content of 0.16-0.2% wt, maximum ash content of 0.8-1%wt, maximum nitrogen content of 0.6% wt.

Basis locations:

CFR Northeast Asia: China (Shanghai, Nanjing, Nantong, Qingdao, Tianjin, Guangzhou), South Korea (Busan, Kwangyang, Incheon, Ulsan, Yeosu).

Recycled Polymers

Recycled Polyethylene Terephthalate (R-PET)

Specification:

Flakes: intrinsic viscosity of 0.70–0.78, PVC content of 50-100 ppm and 100% clear in color.

Premium grade flakes: intrinsic viscosity of 0.70–0.78 for FOB Southeast Asia and 0.72-0.78 for India, PVC content of less than 30 ppm and 100% clear in color.

Food-Grade Pellets: intrinsic viscosity of 0.8, post-consumer feedstock origin and 100% clear in color.

Basis locations:

FOB Southeast Asia: Thailand (Bangkok), Malaysia (Port Klang), Indonesia (Jakarta).

FOB India: Hazira, Nhava Sheva and Mundra.

Recycled HDPE (R-HDPE)

Specification:

Film pellets: clear in color and used for consumer packing applications.

Blowmolding pellets SEA: reflects black pellets used for consumer packing applications with a typical melt flow index of up to 2.0 grams/10 minutes when measured at 190 degrees Celsius with a 2.16 kg sample.

Blowmolding pellets ex-works India: reflects deodorized black pellets from PCR waste, with a typical melt flow index of up to 0.3-0.7 grams/10 minutes when measured at 190 degrees Celsius with a 2.16 kg sample.

Basis locations: FOB Southeast Asia: Malaysia (Port Klang), Thailand (Bangkok), Indonesia (Jakarta), Singapore, the Philippines (Batangas) and Vietnam (Cat Lai).

Recycled LDPE (R-LDPE) film pellets

Specification: Natural pellets used for consumer packing applications, with a melt flow index of 0.2-2.2 when measured at 190 degrees Celsius with a 2.16 kg sample and a mesh size of minimum 80.

The assessments reflect pellets un-adulterated with color pigments. Natural color refers to a wide variety of off-white shades, including, but not limited to, the codes below:

Color Descriptor_Hex Color Code*	
Cream	#EFEBDC
Signal white	#F4F8F4
Pure white	#F7F9EF
Traffic white	#F7FBF5
Ghost white	#F8F8FF
Ivory	#FFFFF0
Bone white	#F9F6EE
Off White	#FAF9F6

Natural recycled resin colors

Cream		Ghost white	
Signal white		Ivory	
Pure white		Bone white	
Traffic white		Off white	

Note: The colors are based on best estimates
Source: S&P Global Energy

Basis locations: Malaysia (Port Klang), Thailand (Bangkok), Indonesia (Jakarta), Singapore, the Philippines (Batangas) and Vietnam (Cat Lai).

Asian Recycled and Virgin Polymer Spot Price Spreads

Platts publishes weekly calculated spreads relating to its Asian recycled plastic and virgin polymer price assessments. The calculated spreads are between virgin polymers and their respective recycled grade as well as spreads within the recycled plastic value chains.

Platts also publishes similar spread calculations in Europe and North America.

Duties: ex-tank China includes prevailing value-added tax.

Oxo-alcohols

Specification:

Normal butanol (NBA): Minimum purity of 99.5%, maximum water content of 0.05%.

Iso-butanol (IBA): Minimum purity of 99.8%.

2-Ethyl Hexanol (2-EH): Minimum purity of 98%.

Basis locations:

NBA: CFR China: Zhangjiagang, Lanshan, Ningbo, Zhenjiang, Zhuhai.

NBA: CFR Southeast Asia: Indonesia (Merak), Singapore (Jurong Island), Thailand (Map Ta Phut).

IBA: CFR China: East China.

2-EH: CFR China: Zhangjiagang, Lanshan, Ningbo, Zhenjiang, Zhuhai.

2-EH: CFR Southeast Asia: Singapore (Jurong Island), Thailand (Map Ta Phut), Vietnam (Ho Chi Minh City).

Plasticizers

Specification:

Dioctyl Phthalate (DOP): Minimum purity of 99.5%; maximum water content of 0.05%; maximum free water content of 0.05%; maximum color of 25 Hazen.

Dioctyl Terephthalate CFR China (DOTP): Maximum water content of 0.05%.

Locations:

DOP: CFR China: Zhangjiagang, Changzhou, Shantou, Ningbo, Wenzhou, Tianjin.

DOP: CFR Southeast Asia: Indonesia (Jakarta), Malaysia (Pasir Gudang, Port Klang), the Philippines (Manila), Thailand (Bangkok, Laem Chabang), Vietnam (Ho Chi Minh City).

DOTP: CFR China: Tianjin, Qingdao, Huangpu and Xiaoxin.

DOTP: CFR Southeast Asia: Vietnam (Cat Lai, Haiphong, Ho Chi Minh City), Thailand (Bangkok), Indonesia (Jakarta, Surabaya), Malaysia (Port Klang, Penang, Pasir Gudang) and the Philippines (Manila).

Phthalic Anhydride (PA)

Specification: Flake grade with minimum purity of 99.5%.

Basis locations:

CFR China: Shanghai, Huangpu, Ningbo.

CFR Southeast Asia: Indonesia (Jakarta, Surabaya), Singapore (Jurong Island), Vietnam (Ho Chi Minh City), Thailand (Bangkok), Malaysia (Pasir Gudang, Port Klang, Penang), the Philippines (Manila).

Acetic Acid (AA)

Specification: Minimum purity of 99%.

Basis locations:

CFR Far East Asia: Taiwan (Kaohsiung, Mailiao, Taichung), South Korea (Ulsan).

CFR Southeast Asia: Indonesia (Jakarta), Thailand (Bangkok).

CFR South Asia: India (Kandla, Mumbai, Mangalore, Cochin).

FOB China: Jiangyin, Zhangjiagang.

Ex-tank China: Jiangyin, Zhangjiagang.

Acetic Anhydride

Specification: Standard purity of 99.5%.

© 2025 by S&P Global Inc. All rights reserved.

Vinyl Acetate Monomer (VAM)

Specification: Minimum purity of 99%.

Basis locations:

CFR China: Ningbo, Jiangyin, Nantong, Shanghai, Zhangjiagang.

CFR Southeast Asia: Indonesia (Jakarta), Thailand (Bangkok).

CFR South Asia: India (Kandla, Mumbai).

Ex-tank China: Jiangyin, Zhangjiagang.

Acrylonitrile (ACN)

Specification: Minimum purity of 99.9%.

Basis locations:

CFR Far East Asia: China (Ningbo, Lianyungang, Shanghai, Lanshan, Qinhuangdao), Taiwan (Kaohsiung).

CFR Southeast Asia: Indonesia (Jakarta), Thailand (Map Ta Phut, Bangkok).

CFR South Asia: India (Kandla, Mundra, Mumbai, Cochin).

Ethylene Dichloride (EDC)

Specification: Minimum purity of 99%.

Basis locations:

CFR Far East Asia: South Korea (Daesan, Ulsan, Yeosu), Taiwan (Kaohsiung, Mailiao), Japan (Mizushima, Chiba, Tokuyama, Kashima, Ube, Oita, Yokkaichi, Kawasaki), China (Shanghai, Dalian, Nanjing, Shantou, Guangzhou, Shenzhen, Nantong, Ningbo, Tianjin).

CFR Southeast Asia: Indonesia (Merak), the Philippines (Manila Bay anchorage, barge cost not included), Malaysia (Kertih), Thailand (Map Ta Phut).

Vinyl Chloride Monomer (VCM)

Specification: Minimum purity of 99%.

Basis locations:

CFR Far East Asia: South Korea (Daesan, Ulsan, Yeosu), Taiwan (Kaohsiung, Mailiao), Japan (Mizushima, Chiba, Tokuyama, Kashima, Ube, Oita, Yokkaichi, Kawasaki), China (Shanghai, Dalian, Nanjing, Shantou, Guangzhou, Shenzhen, Nantong, Ningbo, Tianjin).

CFR Southeast Asia: Indonesia (Merak), the Philippines (Manila Bay anchorage, barge cost not included), Malaysia (Kertih), Thailand (Map Ta Phut).

Carbon Black

Specification: Particle size 25-35 mm.

Glacial Acrylic Acid (GAA)

Specification: Minimum purity of 99.5%, minimum MEHQ inhibitor of 180 ppm and dimer as per market standard.

Butyl Acrylate (BA)

Specification: Minimum purity of 99.5%, MEHQ inhibitor of 10-50 ppm.

Methyl Methacrylate (MMA)

Basis locations:

CFR China: Zhangjiagang.

CFR Southeast Asia: Thailand (Map Ta Phut).

Specification: Specific gravity at 20°VVC/4°VVC 0.942 to 0.946, free acid content of 0.005% or less, moisture content (KF method) of 0.05% or less, monomer content of 99.8% or more, number of colors (APHA) at 5 or less, and free acids (methacrylic acid) at 0.005% or less.

Bisphenol-A

Specification: White prills or solid; Water Content: Max 100 ppm; Phenol content: Max 100 ppm; Purity: Min 99.8; Freezing Point: 156.5 °C; Ash: 20 wt-ppm.

Basis locations:

Ex-tank China: East China and Shandong.

CFR India: Nhava Sheva, Hazira and Mundra.

Packaging: CFR India: in jumbo bags filling at least 500 kg/bag, in a twenty-foot equivalent unit (TEU).

Polyols

Specification: Slabstock polyol with molecular weight of 3000-3500 g/mol.

Basis locations: Kandla and Nhava Sheva.

Polymeric Methylenediphenyl Diisocyanate (PMDI)

Specification: Isocyanate (NCO) content: 30.4-32%.

Basis locations: Kandla and Nhava Sheva.

Toluene Diisocyanate (TDI)

Specification: T80 grade with min 99.5% purity, Isomer content in 2.4 at 79%-81%, and in 2.6 at 19%-21%.

Basis locations: Nhava Sheva and Chennai.

Chlor-alkali

Caustic Soda

Specifications:

FOB Northeast Asia and CFR Southeast Asia: Caustic soda solution 50% commercial grade (membrane or diaphragm).

Ex-works China: Caustic soda solution 32%.

Price indications in liquid metric tons (lmt) are taken into consideration and normalized to dry metric tons on the basis that the caustic soda content of 1,000 lmt is equal to that of 500 dmt, unless otherwise stated.

Basis locations:

FOB Northeast Asia: South Korea (Daesan, Ulsan, Yeosu), Taiwan (Kaohsiung, Mailiao), Japan (Mizushima, Chiba, Tokuyama, Kashima, Ube, Oita, Yokkaichi, Kawasaki), and China (Shanghai, Dalian, Nanjing, Shantou, Guangzhou, Shenzhen, Nantong, Tianjin, Ningbo).

CFR Southeast Asia: Indonesia (Merak), the Philippines (Manila), Thailand (Map Ta Phut) and Malaysia (Kertih).

Ex-works China: East China.

Duties: ex-works China includes prevailing value-added tax.

Chlorine

Specification: Liquid/gas chlorine with a minimum purity of 99.5% by volume, moisture of 50 PPM max by weight.

The cost calculation formula is based on deducting cost of ethylene component and Ethylene Dichloride (EDC) conversion from EDC FOB NE Asia price, which is further converted into chlorine cost.

Soda Ash

Specification: Light soda ash: density between 500-750 kg/m3 and minimum purity of 98.5%.

Basis locations: Nhava Sheva and Mundra.

Global Chemical Indices

The indices' weighting factors reflect the relative sizes of the regional markets based on production capacity, as of 2025.

Platts Global Petrochemical Index (PGPI) is calculated based on the individual global product indices with the following weight distribution: 0.27 ethylene, 0.23 propylene, 0.11 benzene, 0.09 toluene, 0.11 paraxylene, 0.04 LDPE, and 0.15 PP.

The indices appear on Platts Chemical Alert (PCA) page 900.

Glossary

Incoterms

CFR – cost and freight

CIF – cost, insurance and freight

FOB – free on board

Chemical abbreviations

MTBE – methyl tertiary-butyl ether

HDPE – high density polyethylene

LDPE – low density polyethylene

LLDPE – linear low density polyethylene

LLDPE C4 – Butene grade LLDPE

LLDPE C6 – 1-Hexene grade LLDPE

GPPS – general purpose polystyrene

HIPS – high impact polystyrene

EPS – expandable polystyrene

ESBR – emulsion styrene butadiene rubber

H-PBR - High-Cis polybutadiene rubber

L-PBR - Low-Cis polybutadiene rubber

Assessments

MMF – methanol marine fuel

Locations

NEA – Northeast Asia

SEA – Southeast Asia

Quality

IV – intrinsic viscosity, a measure of molecular weight, or the degree of its polymerization

B* - a measure of the degree of yellowness of the PET resin

GP – general purpose

CSF – cast stretch film

Other abbreviations

CP – contract price

ACP – Asia contract price

M1 – current month

M2 – second month

M3 – third month

M4 – fourth month

M5 – fifth month

H1 – first half

H2 – second half

W1 – first half-month window

W2 – second half-month window

W3 – third half month window

W4 – fourth half-month window

W5 – fifth half-month window

W6 – sixth half-month window

Bal - balance

L/C – letter of credit

TT – telegraphic transfer

CAD - Cash against document

Revision history

November 2025: Platts launched FOB China Orthoxylene price assessments Oct. 17, 2025. Platts launched Recycled PET pellets food grade India domestic price assessment Oct. 1, 2025.

In September 2025, Platts updated the global petrochemical indices weightings to reflect production capacities in 2025. Platts launched weekly Toluene Diisocyanate (TDI) price assessment Sept. 12, 2025. Platts changed payments terms for CFR India phenol and acetone and delivery basis for CFR India acetone Sept. 26, 2025. Platts launched CFR SEA Butene-1 weekly price assessment Sept. 26, 2025

In August 2025, Platts launched weekly recycled HDPE Blow Molding price assessment Aug. 20, 2025

In June 2025, Platts discontinued weekly averages of global propylene oxide, polyol, isocyanate spot assessments June 1, 2025.

In May 2025, Platts launched Shanghai low-carbon methanol daily assessments May 2, 2025.

In April 2025, Platts launched China domestic hexamethylenediamine weekly price assessment Apr. 9, 2025.

February 2025: Platts updated Solvent MX methodology for CFR India Assessments and launches new cash differential vs FOB Korea Feb 28, 2025.

February 2025: Platts launched weekly India carbon black spot price assessment.

February 2025: Platts completed an annual review of this guide.

January 2025: Platts launched methodology changes for weekly FOB Korea solvent-MX assessments Jan. 10, 2025.

January 2025: Platts launched CFR Vietnam polyethylene, polypropylene assessments Jan. 8, 2025.

January 2025: Platts updated FOB Korea toluene methodology, discontinues CFR China and FOB SE Asia assessments Jan. 2, 2025.

January 2025: Platts implemented changes in MTBE methodology, launches new differential Jan. 2, 2025.

January 2025: Platts launched CFR Vietnam polyethylene, polypropylene assessments

December 2024: Platts launched FOB Northeast Asia liquid epoxy resins assessment Dec. 17, 2024.

November 2024: Platts launched weekly Turkish, Indian acrylic staple fiber spot assessments Nov 14

November 2024: Platts launched Singapore low-carbon methanol marine fuel assessments from Nov. 11, 2024

November 2024: Platts changes CFR South Asia weekly acetic acid assessment payment terms, delivery laycan

November 2024: Platts launched ethyl acetate FOB China, CFR SE Asia weekly spot assessments Nov. 5, 2024.

November 2024: Platts launched daily FOB Saudi Arabia LDPE, HDPE Blowmoulding spot assessments

November 2024: Platts launched weekly natural rubber FOB Southeast Asia assessment Nov. 1, 2024.October 2024: Platts launched weekly outright raffinate-1 CFR Northeast Asia assessment and its cash differential against naphtha on Oct. 4, 2024.

October 2024: Platts launched weekly Asian POM resin spot assessment Oct. 30, 2024.

October 2024: Platts launches weekly Asian PBT resin spot assessments Oct. 30, 2024.

October 2024: Platts launched weekly isobutanol CFR China assessment Oct. 3, 2024.

September 2024: Platts changed CFR India phenol, acetone delivery laycan effective Sept. 27, 2024.

September 2024: Platts launched Acetic Anhydride FOB India Weekly spot assessment Sept. 19, 2024.

September 2024: Platts launched daily Asia butyl acrylate assessment Sept. 2, 2024,

July 2024: Platts launched daily R-PET food grade pellets FOB India daily assessment July 5 2024

June 2024: Platts launched daily HDPE pipe natural CFR S Asia assessment May 15, 2024.

April 2024: Platts launched weekly Soda Ash(Light) CFR India assessment April 30, 2024.

April 2024: Platts launched daily Slabstock Polyols CFR India assessment April 1, 2024.

April 2024: Platts launched daily Polymeric Methylenediphenyl Diisocyanate (PMDI) CFR India assessment April 1, 2024.

April 2024: Platts launched daily FOB Southeast Asia and FOB Northeast Asia ethanolamines spot assessments April 2, 2024

April 2024: Platts launched daily ex-works North China and East China glacial acrylic acid spot assessments April 1, 2024

April 2024: Platts launched daily FOB Thailand and FOB India cyclohexane spot assessments April 1, 2024

© 2025 by S&P Global Inc. All rights reserved.

April 2024: Platts launched daily FOB China adipic acid spot assessments April 1, 2024

April 2024: Platts launched daily FOB China Nylon-6 and Nylon-66 resin spot assessments April 1, 2024

April 2024: Platts launched daily production cost-based high-purity ethylene oxide FOB Northeast Asia April 1, 2024.

March 2024: Platts launched daily CFR China ethylene vinyl-acetate spot assessments March 11, 2024

March 2024: Platts updated Asian Paraxylene assessment specifications March 11

March 2024: Platts launched domestic China isomer-MX assessments March 1, 2024.

March 2024: Platts launched daily polycarbonate CFR China assessment March 1, 2024

February 2024: Platts launched weekly high-Cis polybutadiene rubber (H-PBR) CFR Northeast Asia and CFR Southeast Asia assessments Feb. 2, 2024.

February 2024: Platts launched daily FOB Southeast Asia recycled polyethylene terephthalate food grade pellets assessment Feb. 1, 2024.

February 2024: Platts launched weekly chlorine FOB Northeast Asia assessment Feb. 1, 2024.

January 2024: Platts discontinued methanol CFR India freight netback assessment Jan. 16, 2024.

January 2024: Platts updated Paraxylene CFR China/Taiwan methodology Jan. 2, 2024.

January 2024: Platts completed an annual review of this guide.

January 2024: Platts launched daily FOB Saudi Arabia PP raffia, and DDP GCC (Dubai, Muscat) PP raffia assessments Jan. 2, 2024

December 2023: Platts changed the laycan and cargo size approach for CFR India toluene assessment Dec. 13, 2023.

December 2023: Platts launched daily ethylbenzene China domestic assessments Dec. 1, 2023.

December 2023: Platts launched daily propylene oxide CFR China assessments Dec. 1, 2023.

December 2023: Platts launched weekly diethylene glycol and triethylene glycol China domestic assessments Dec. 1, 2023.

December 2023: Platts launched daily bisphenol-A (BPA) CFR India and East China domestic ex-tank assessments Dec. 1, 2023.

November 2023: Platts updated the CFR China benzene physical marker letter-of-credit to 30 days Nov. 1, 2023.

October 2023: Platts launched daily near-haul CFR NEA paraxylene assessments Oct 2, 2023.

August 2023: Platts launched daily Paraxylene Jiaxing port spread assessments Aug. 3, 2023.

August 2023: Platts launched daily MTBE FOB China assessments Aug. 1, 2023.

August 2023: Platts launched daily PTA FOB China assessments July 3, 2023.

August 2023: Platts launched daily production cost-based eMethanol FOB Shanghai assessments June 19, 2023.

May 2023: Platts completed an annual review of this guide.

May 2023: Platts launched daily r-PET flakes FOB India assessments Apr 3, 2023

March 2023: Platts no longer includes Russia as potential origin source in Asia MTBE March 17, 2023

March 2023: Platts updated the calculations of LNG prices per energy content to reflect the Platts standard conversion rates on Jan. 31. LNG Bunker Singapore expressed in $/GJ, are calculated by dividing the base $/MMBtu LNG prices by 1.055.

January 2023: The specification guide has been renamed to Asia-Pacific Chemicals

December 2022: Platts updated the weighting used in the Platts Global chemical Indices to reflect production capacities in 2022 and better represent the relative sizes of the regional markets on Dec. 6, 2022.

December 2022: Platts launched daily butadiene FOB China assessments on Dec. 1, 2022.

December 2022: Platts clarified on Nov. 23, 2022 that import duty is reflected in its India domestic ex-tank methanol assessments. The import duty currently totals 2.75% based on a basic customs duty (BCD) rate of 2.5% plus an additional 10% social welfare surcharge (SWS) levied on the BCD rate.

November 2022: Platts launched daily toluene FOB China assessments on Nov. 1, 2022.

November 2022: Platts launched assessments of methanol derivatives which settle against the physical Platts methanol CFR China marker on Oct. 3, 2022.

November 2022: Platts launched new India domestic methanol ex-tank assessments Sept. 26, 2022.

September 2022: Platts made minor edits to language on

© 2025 by S&P Global Inc. All rights reserved.

berth description for benzene FOB Korea, and removed cost comparisons for alternative marine fuels in Houston under the methanol bunker Singapore section.

September 2022: Platts started publishing Asia/open origin spread assessments for Asia paraxylene CFR Taiwan/China on Aug. 26, 2022.

September 2022: Platts launched a daily recycled high density polyethylene (R-HDPE) black blow moulding pellet FOB Southeast Asia assessment on Aug. 1, 2022.

September 2022: Platts launched daily styrene monomer FOB China assessments on July 1, 2022.

May 2022: Platts clarified the description of natural color for recycled polyethylene assessments.

April 2022: Platts added a table listing the symbols for the recycled to virgin polymer price spreads

March 2022: Platts launched daily ethylene-grade PVC and carbide-based PVC FOB China assessments on March 1, 2022.

March 2022: Platts completed an annual review of this guide in February 2022, reviewing all content, correcting typos and making minor edits to language.

March 2022: Platts added two new DOTP assessments Jan 6, 2022.

March 2022: Platts extended the benzene derivatives assessments to include derivative contracts for up to six months forward from Jan. 3, 2022.

March 2022: Platts started reflecting only non-sanctioned material in its CFR China methanol assessment, effective Jan. 3, 2022.

March 2022: Platts included Jiaxing port in East China as a non-par delivery port in the paraxylene CFR Taiwan/China MOC assessment process from Jan. 3, 2022.

October 2021: Platts launched delivered methanol bunker fuel assessment in Singapore, and daily cost comparisons for alternative marine fuels reflecting the calorific value comparison of methanol bunker fuel, LNG bunker fuel, marine fuel oil and marine gasoil on Oct. 25, 2021. Platts corrected typo on terminal nominations for trades published in the PX CFR Taiwan/China MOC assessment process. Platts launched India CFR methanol daily assessment on Oct, 1, 2021. Platts launched CFR South Asia LDPE daily assessment on Sept. 1, 2021, and amended the basket of ports for South Asia PE assessments on Oct. 6, 2021.

July 2021: Platts changed the credit terms for its daily CFR India toluene assessments to reflect letter of credit (L/C) 90 days from July 1, 2021.

July 2021: Platts launched recycled low density polyethylene (R-LDPE) film pellets FOB Southeast Asia assessment on June 23, 2021.

May 2021: Platts changed the credit terms for its weekly CFR India styrene monomer assessment to reflect letter of credit (L/C) 90 days with effect from May 3, 2021.

May 2021: Platts updated the description of ENEOS Corporation benzene CP nomination and settlement in the aromatics table.

April 2021: Platts completed an annual review of this guide in March 2021, reviewing all content, correcting typos, making minor edits and adding clarity to language and tables.

April 2021: Platts added terminal nominations for trades published in the PX CFR Taiwan/China MOC assessment process, and details on benzene and PX derivatives assessments.

April 2021: Platts updated the guide to reflect the unit of measurement for caustic soda spot price assessments is dry metric tons.

April 2021: Platts clarified that its PVC CFR India assessment is assessed basis L/C 30 days.

April 2021: Platts clarified that its PVC, PTA, caustic soda China domestic assessments reflect loading 0-10 days forward from the date of publication.

April 2021: Platts clarified that its polyester yarn and fiber China domestic assessments reflect ex-works basis.

April 2021: Platts clarified that its polypropylene raffia China domestic assessment does not include import duties, the standard import duty used in the calculation of the import parity equivalent of the benzene East China domestic assessments is 2%, and all its China domestic assessments including benzene, polyethylene, PVC, acetic acid, VAM and caustic soda are inclusive of the prevailing value added tax.

April 2021: Platts clarified paraxylene derivatives credit and trading terms.

April 2021: Platts launched FOB Southeast Asia recycled PET premium grade clear flakes assessment on March 24, 2021.

January 2021: Platts has added Dumai to the basket of ports reflected in its CFR Southeast Asia methanol assessment, and has amended the port basket to reflect Port Klang, Kuantan, Dumai and Singapore as the price basis of its CFR Southeast Asia methanol assessment, effective January 4, 2021. The previous basket of ports comprised Jakarta, Merak, Surabaya, Port Klang, Kuantan, Kertih, Singapore, Bangkok and Map Ta Phut.

January 2021: Platts discontinued the publication of its weekly toluene CFR Taiwan LC 0-30 days assessment from January 4, 2021.

© 2025 by S&P Global Inc. All rights reserved.

January 2021: Platts launched PMMA CFR China and CFR Southeast Asia assessments on December 14, 2020.

January 2021: Platts launched recycled high density polyethylene (R-HDPE) film pellets FOB Southeast Asia assessment on December 9, 2020.

November 2020: Platts launched daily paraxylene CFR Taiwan/China derivatives assessments on November 2, 2020.

September 2020: Platts started databasing paraxylene Asia Contract Price (ACP) nominations from ExxonMobil, Idemitsu Kosan, ENEOS Corporation and SK Global Chemical, and updated its PX and benzene ACP nomination and settlement to reflect the change in the company name of JXTG Nippon Oil & Energy Corporation to ENEOS Corporation from September 1, 2020.

September 2020: Platts discontinued the toluene CFR China LC 0-30 days assessments from August 14, 2020.

September 2020: Platts changed the frequency of the toluene CFR India outright assessment to a daily basis from a weekly assessment previously, and launched a toluene CFR India cash differential daily assessment on August 3, 2020. Platts changed the delivery laycan for the toluene CFR India assessments to reflect the third half-month cycle, from 20-40 days forward from the date of publication previously, changed the delivery ports to reflect Kandla and Mumbai from Kandla, Mumbai and Visakhapatnam previously, and added a minimum purity content of 99.5% to the quality specifications for the CFR India assessments from August 3, 2020.

July 2020: Platts launched FOB Southeast Asia recycled PET clear flakes assessment on July 1, 2020.

June 2020: Platts launched CFR China and CFR Southeast Asia methyl methacrylate, or MMA, assessments in June 2020.

June 2020: Platts launched the daily CFR China assessment for isomer-MX on June 1, 2020.

May 2020: Platts clarified that its monoethylene glycol China domestic and purified terephthalic acid China domestic assessments have been reflecting parcel sizes of 500-1,000 mt, instead of 50-100 mt for MEG and 100-500 mt for PTA as previously stated in the specifications guide. In April 2020, Platts lowered the quantity reflected in the CFR China phthalic anhydride assessment to 100-300 mt from 500-1,000 mt, effective April 8, 2020.

April 2020: Platts completed an annual review of this guide in March 2020, reviewing all content, correcting typos and making minor edits to language. The typical aromatics operation section was removed as typical nomination standards are already stated in their corresponding sections. Platts updated the PX table to include symbol codes for ACP nominations and settlements, and added a section in the text describing the ACP and CP. Platts launched a daily PX demurrage assessment on March 6, 2020. Platts has changed its PTA CFR India assessment frequency from weekly (Friday) to daily, following market feedback on price volatility and expectation of growing PTA imports into India, effective February 3, 2020. Platts updated the guide to reflect exclusion of terminals that cannot accommodate vessels larger than 5,000 dwt in the benzene CFR China Market on Close assessment process from November 1, 2019.

February 2020: Platts amended its CFR Taiwan/China PX laytime, demurrage guidelines and will only publish bids and offers that do not state vessel size in its Market on Close assessment process from January 6, 2020.

February 2020: Platts has included Jiangyin in CFR Taiwan/China paraxylene MOC assessment process from January 2, 2020.

February 2020: Platts launched the daily East China basis Chinese Yuan (CNY) conversion of the first published laycan of the CFR Taiwan/China paraxylene (PX) assessment on November 1, 2019.

July 2019: Platts revised the CFR India methanol assessment to a freight netback formula from its CFR China methanol assessment.

July 2019: Platts launched China domestic polyester yarn and fiber assessments in April 2019.

July 2019: Platts clarified in March 2019 that it would reflect prevailing value added tax in the VAT component of import parity calculations in its domestic China assessments.

July 2019: Platts moved Sections 1-6 of the Platts Methodology and Specifications Guide into a standalone methodology guide.

April 2019: Platts launched butadiene CFR Northeast Asia assessment in January 2019.

March 2019: [Annual Review] Platts completed an annual read-through of the methodology guide, making general typographical changes.

December 2018: Platts changes CFR China methanol delivery laycan to 20-50 days forward from 20-40 days forward.

December 2018: Platts assesses Asia Benzene Domestic East China marker, Domestic East China Import Parity marker, Sinopec Listed Price.

December 2018: Platts discontinues orthoxylene CFR India assessment.

December 2018: Platts moves Asian chemicals freight methodology and tables to Freight methodology and specifications guide.

October 2018: Platts updates MTBE FOB factor to MTBE FOB Singapore factor.

October 2018: Platts updates cargo size for Styrene Monomer CFR China assessment, from 2,000 mt to 2,000-3,000 mt

© 2025 by S&P Global Inc. All rights reserved.

October 2018: Platts launches CFR India assessment for solvent-MX, and revises quality specifications for solvent-MX.

October 2018: Platts changes the methanol CFR India MOC process from Fridays to Wednesdays.

September 2018: Platts removes Taizhou, Zhangjiagang from CFR China benzene assessments.

August 2018: Platts updates Chinese VAT from 17% to 16% across all Petchems products with a domestic Chinese assessment.

August 2018: Platts launches domestic east China and Shandong China daily propylene assessments.

August 2018: Platts updates solvent mixed xylenes CFR China ports.

June 2018: Platts assesses domestic East China benzene cargoes for prompt, Mo01 and Mo02 laycans.

June 2018: Platts revise methanol cargo volume for CFR China and CFR India.

May 2018: Platts to independently assess CFR Taiwan styrene monomer.

May 2018: Platts revises laycans in Asian benzene marker. Platts added an extra half-month laycan to the Asian benzene FOB Korea assessment on January 15, 2018.

April 2018: [Annual Review] Added revised parts I-VI. General typographical changes, deletions of repeated text. Removed language related to normalization already included in parts I-VI. Platts revises the weekly Wednesday domestic China PP Raffia assessments to daily assessments on Febuary 1, 2018. Platts adds an extra forward half-month marker laycan to the FOB Korea benzene assessment from January 15, 2018. Platts adds load points in the MTBE FOB Singapore marker to reflect the same loading ports for the Asian Gasoline FOB Straits methodology from January 5, 2018.

January 2018: Platts launches daily forward domestic China styrene assessments on February 1, 2018.

January 2018: Platts revises the timing for Asia polypropylene to 20-45 days forward from 15-30 days forward, starting January 4, 2018.

January 2018: Platts moves the three half-month marker laycans in the FOB Korea and CFR Taiwan/China paraxylene assessments forward by a half-month, simultaneously removing the prompt half-month laycan from the marker, from January 2, 2018.

December 2017: Platts clarifies Asian paraxylene credit terms. Platts discontinues certain Asian paraxylene ports of delivery in the CFR Taiwan.China assessments.
